

PBRC SPUR – RULES & SETUP

04/07/2004

Spur

Description of Race

The horse and rider must go through the first set of pylons, make a three hundred sixty (360) degree turn around the pole, returning through the second set of pylons. A right or left-hand pattern may be run.

Equipment

Five (5) highway type pylons eighteen (18) to twenty-eight (28) inches in height. The center pylon should have a maximum base size of seventeen (17) inches, contain a seven (7) foot pole, and weigh a maximum of twelve (12) pounds. The center pylon is placed one hundred twenty (120) feet from the start and

finish line and is centered in the arena. Two (2) gates are formed one on each side of the arena with two (2) pylons used to form each gate. The pylons forming the gates are to be set ten (10) feet apart, ten (10) feet from the start and finish line, and thirty (30) feet from the centerline of the arena to leave sixty (60) feet between the set of pylons. All measurements are to be made from the inside base of the pylons.

Judges

Two (2) judges to observe the pattern and to reset the pylons in the proper place, if they are knocked over.

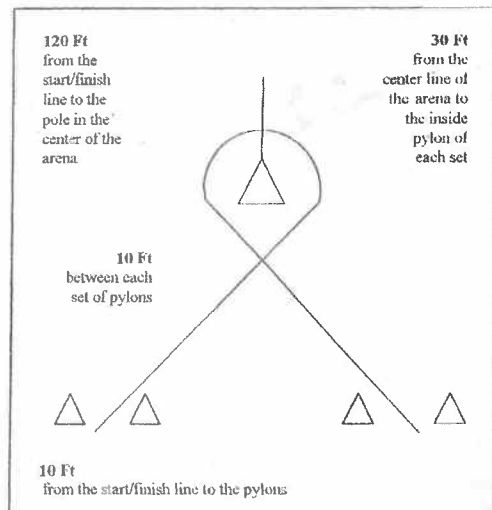

Penalties

- None

Disqualification

- Breaking the pattern.
- Knocking over any

**All measurements from the inside base of the pylon
